

Some important tags in html

Div tag :

Block tag / occupy the space total

Like a container

Span tag :

inline tag / occupy only required space not extra

Like a container

**** semantic tag and non semantic tag ****

Semantic tag :

Shows related information about web pages and tells us to browser

Non -Semantic tag :

Don't Shows related information about web pages and tells us to browser

Section tag : like a div tag and span tag but div, and span don't show related content instead it show semantic tag as section tag

*****Entites :*****

HTML Entities

<u>space</u>	 	nbsp - non breaking space
<	<	
>	>	

- An HTML entity is a piece of text ("string") that begins with an ampersand (&) and ends with a semicolon (;).
- used to display **reserved characters** (which would otherwise be interpreted as HTML code), and **invisible characters** (like non-breaking spaces).
- can also use in place of characters that are difficult to type with a standard keyboard.
- browser interprets them & renders correct character
